

Dr Kate Barker

As machines take on more of the thinking, the last advantage is the one no machine can manufacture: **human judgement, conviction and trust.**

Dr Kate Barker is the executive advisor the advisors call. She counsels heads of state, boards and global chief executives on AI transformation, policy and the psychology of leadership. A TIME100 AI Impact Award honouree, ranked the world's No.1 Chief Futurist, she has helped shape some of the world's most transformative megaprojects, with work spanning sovereign programmes, governments and over 100 Fortune 500 companies, from the Gulf to Europe, Asia and North America. As a keynote speaker, she has presented at the world's leading forums, including the World Economic Forum and the World Government Summit. Her doctoral research on AI, leadership and organisational trust draws on 6,000 executive leaders worldwide. She is the author of *Hidden Power: Human Judgement in the AI Era*.
